

Post-doctoral Fellow at Johns Hopkins University, Department of Cognitive Science

Candidates are invited to apply for a postdoctoral fellowship in the department of Cognitive Science at Johns Hopkins University to carry out research on the development of spatial representation in normally developing children and people with Williams syndrome, who have severe visual-spatial impairments. We seek applicants that have broad interdisciplinary training in spatial representation, and a strong interest in development, learning and plasticity. Target areas of interest include representation of faces and objects, spatial navigation, visual-manual action, spatial attention, and learning and plasticity within these. Funding is guaranteed for one year with a one-year renewal contingent on review. Candidates will have access to state-of-the-art computer and eye-tracking equipment, easily used subject pool, and imaging facilities, should those be needed.

Applications will be reviewed immediately and the position will remain open until filled with a start date of May 1, 2009 or later.

Please send cover letter, vita, research statement, and names of three recommenders to Dr. Barbara Landau ([landau@cogsci.jhu.edu](mailto:landau@cogsci.jhu.edu)), Department of Cognitive Science, 241 Krieger Hall, Johns Hopkins University, Baltimore, MD 21218

The Johns Hopkins University is an Equal Opportunity, Affirmative Action employer, Minorities, women, Vietnam-era veterans, disabled veterans and individuals with disabilities are encouraged to apply.
