

University of Alberta Spatial Cognition Post-doc Position

The laboratory of spatial cognition and virtual environments (<http://www.ualberta.ca/~wmou/lab/>) at the **University of Alberta** offers a **2-year post-doc position**, preferably starting in July 1st, 2010.

Our research addresses the foundations of human spatial cognition. We are currently interested in the human spatial memory and navigation. We conduct lab-based experimental studies using one virtual reality and one augmented reality systems located in the lab.

Successful candidates will develop their own project in the context of the lab research. There will be enormous collaboration opportunities with other professors in the spatial cognition areas in the psychology department, including Dr. Alinda Friedman (<http://www.psych.ualberta.ca/~alinda/>), Dr. Marcia Spetch (<http://www.psych.ualberta.ca/~mspetch/SpetchLab/index.html>).

Requirements for the position are a degree in Experimental psychology or a closely related area, as well as good skills in statistical analyses, experimental methods, and writing.

To apply, please send a cover letter highlighting personal skills and qualities relevant for the position, a detailed CV, a research statement (no more than two pages), a list of publications and two letters of recommendation to Dr. Weimin Mou at wmou@ualberta.ca. Priority will be given to applications received **before April 30th**, though applications will be considered until the position is filled.
